Main Contractor: Bryant Construction
Electrical Contractor: How Engineering
Mechanical Contractor: How Engineering

Description of Project:

115 Colmore Row is a 85,000ft squared office block in the centre of Birmingham. The Block is solely occupied by Eversheds Solicitors.

Our Duties within the project were to advise the client on suitable electrical and mechanical service installations for incorporation within the base build project.

In addition, for the corporate areas of the building and in the ground and first floors, which were to be in the main reception and greetings area, dining spaces and meeting rooms, we designed the mechanical and electrical services installations within.
